International Independent Interdisciplinary Scholar-led Non-Profit Since
Research Networks Conferences Journals Books Media Lab 1984

Dear Conference Participants,

On behalf of Common Ground Research Networks, I welcome you to the Aging & Social Change: Sixteenth Interdisciplinary Conference

Founded in 2011, the Aging & Social Change Research Network is a forum for discussion of challenges and opportunities for a rapidly growing segment of the population worldwide. The process of aging is a concern for individuals, families, communities, and nations. The social context of aging provides a rich background for community dialogue on this, one of the critical questions of our time. We aim to traverse a broad terrain, sometimes technically and other times socially oriented, sometimes theoretical and other times practical in their perspective, and sometimes reflecting dispassionate analysis while at other times suggesting interested strategies for action. Our aim is to build an epistemic community where we can make linkages across disciplinary, geographic, and cultural boundaries.

This truly international conference brings together a diverse group of scholars, practitioners, and thought leaders from around the world. We are proud to provide a platform for exchanging ideas, and presenting research, addressing some of the pressing issues of our time.

Our conference theme, "Demographic Futures: Political and Social Transformations," reflects our commitment to exploring new frontiers in research and practice. Over the next few days you will have the opportunity to view keynotes, panel discussions, and other session types led by our Emerging Scholars. We encourage you to take full advantage of these sessions to gain new insights, expand your professional network, and find inspiration for your own work.

We want to thank our keynote speakers Gloria Gutman, Terence Seedsman, conference chair Prof. Dr. İsmail Tufan, presenters, and volunteers whose dedication and hard work have made this conference possible. We also thank our host partner Akdeniz University, for their generous support.

We hope you find this conference to be an intellectually stimulating and rewarding experience. Your active participation is crucial to the success of this event, and we look forward to the lively discussions and valuable connections that will emerge over the next few days.

Warm regards,

A handwritten signature in black ink, appearing to read 'P. Cope'.

Dr. Phillip Kalantzis Cope
Chief Social Scientist
Common Ground Research Networks

Dear colleagues and friends,

It is my great honor and pleasure to welcome you to the Sixteenth Interdisciplinary Conference on Aging & Social Change. We gather once again across borders and disciplines to critically examine the multifaceted realities of population aging and societal transformation.

We had genuinely hoped and prepared to host all of you in person here in Antalya, a vibrant crossroads characterized by its rich historical heritage and dynamic demographic landscape. However, due to prevailing geopolitical uncertainties and regional developments affecting international travel, this year's gathering had to transition into a fully online format. While we deeply regret not being able to welcome you face-to-face on our Mediterranean shores this autumn, we remain committed to offering our warmest hospitality and look forward to hosting you in Antalya for future academic gatherings and collaborative initiatives.

Today, accelerating demographic transitions worldwide are fundamentally reshaping societies, requiring us to bridge empirical inquiry with transformative social action. Grounded in life-course and person-centered perspectives, this year's conference critically engages with these shifts across interconnected dimensions. We examine the economic and demographic realities of aging communities, from workforce longevity and productivity to fiscal sustainability and social security. Concurrently, our discussions address the urgent need for responsive public policies, the safeguarding of human rights, and the creation of age-friendly, accessible environments that foster civic engagement. Complementing these structural imperatives, the program delves into the medical, biological, and cognitive dimensions of longevity—advancing preventative care, chronic disease management, and individual well-being—while illuminating the rich social and cultural landscapes of aging, family care dynamics, and diverse end-of-life traditions across cultures.

While geographical distance separates us, our shared intellectual mission brings us together. I would like to express my sincere appreciation to each of you for your valuable insights, scholarly contributions, and commitment to advancing gerontological knowledge and social equity. I trust that the online sessions will spark vibrant discussions, cultivate meaningful networks, and inspire future academic collaborations.

Warm regards,
Prof. Dr. phil., habil. İsmail Tufan

Local Conference Chair
Akdeniz University
Department of Gerontology
Antalya, Türkiye

Aging & Social Change Research Network

Founded in 2011, the **Aging & Social Change Research Network** is a forum for discussion of challenges and opportunities for a rapidly growing segment of the population worldwide. The process of aging is a concern for individuals, families, communities, and nations. The social context of aging provides a rich background for community dialogue on this, one of the critical questions of our time. We aim to traverse a broad terrain, sometimes technically and other times socially oriented, sometimes theoretical and other times practical in their perspective, and sometimes reflecting dispassionate analysis while at other times suggesting interested strategies for action. Our aim is to build an epistemic community where we can make linkages across disciplinary, geographic, and cultural boundaries.

The Economic Outlook of an Aging Society

Generally, men aged sixty-five and women aged sixty are classified as older people. In the richer, more developed countries, by 2050 about 30 percent of the population will be over the age of sixty years. A declining working population will have to create the income, wealth, and tax revenues needed to support the economic needs of the rising number of retired people, and this is likely to have enormous financial and political consequences. By 2050, the ratio of working people to those over age sixty-five in the United States will be about 3:1. This will have major implications for Social Security taxes and retirement planning. As a consequence of the large numbers retiring from the labor force, Social Security and other retirement systems will require reorganization. Key challenges include the financing of public pensions, health care costs of the aged, and long-term care. Other significant issues include changes in labor, immigration, and family policies. There will also be a rising risk of retiree poverty for millions of people, especially for those who have been unable to save enough through their pension and retirement plans.

Economic growth, taxation, consumption, investments, and the welfare system will all impact society across all age groups. The public sector will undergo new stresses, as will free market systems and economic growth. In this context, the world economy will demand increased cooperation of governments to resolve socioeconomic and political problems and to assist state and local communities in providing adequate services for the older citizens.

Public Health, Public Policy, and Government and Community Practices

Opportunities for active aging abound, grounded in better health and longer work participation and security. Active aging programs are allowing people to realize their potential for extended physical, social, and mental well-being throughout their life course. These developments may significantly enhance the quality of life for people as they age. For continued success, our future public health policies and institutions will have to assume a leadership role, creating initiatives for the aged that apply both to individuals and population groups. Education programs must be initiated, work policies regarding age must adapt, and health promotion must be at the forefront. Such programs will position the growing, global aged community to continue to be productive, independent participants in life and the new world demographics. There is much knowledge about aging that can be applied, but societies have a record of responding slowly to crisis. Now is the time to prepare for the changes that will face all global societies in the coming decades.

Health, Wellness, and Aging

The health of older people is improving over time. Recent generations have a lower disease occurrence and fewer health problems. Older people can live vigorous and more active lives until a much older age than in the past. Current intensive biomedical anti-aging interventions are helping to extend the health and productivity of human life. For instance, research has shown that a daily active fitness program will not only maintain physical health and cognitive abilities but can enhance physical and mental abilities. With encouragement and the need to be productive, older people can continue to be economic contributors, to the advantage of both the individual and the larger community and society.

Population aging also poses a great challenge for health-care systems world-wide. As the proportion of the aged populations of nations increase, so can the occurrence of disability, frailty, and chronic diseases including Alzheimer's, cancer, cardiovascular, and cerebral diseases. The demand for health services increases as people age. It has been estimated that nearly 60 percent of a person's health costs occur in the year before their death. As the population ages, the expenses of health care will increase, especially for the care of those with chronic ailments and diseases. Planning for these future demographics and the demands on both individuals and society needs to be proactive--not retroactive, when the situation reaches crisis proportions.

Social and Cultural Aspects of Aging

More people than ever are spending a significant amount of their lives in a non-work environment. These numbers will grow at a quickening pace. Living in a society where social lives are structured around work and its organization, how can we cope with a situation in which a large and now ever-growing segment of the population is leaving the domain of formally organized work? Will this new paradigm create a new structure of social inequality? Will we witness the growth of a new affluence divide between age-defined welfare classes and production-based classes? Will age become an increasingly acute differentiator of poverty juxtaposed with productivity and achievement for the producer class?

With the current retirement structure, large shifts from the working population into retirement can be anticipated, often at the expense of the potential contributions of the aged to social well-being. Not only is the ratio of the older to younger adults increasing but also the proportion of well-educated, healthy, and economically secure adults who are entering old age and who have the ability to continue to make significant contributions, but whose opportunities to do so may be limited. Concern over this growing disconnect between aged abilities, and the roles they are expected to fill, suggests we need urgent social policy reform. How can social policy increase the productivity of the aged and reduce the social and financial burden of supporting a growing older population? We need to develop better methods and strategies to integrate and keep aged citizens members of productive society. This leads to a key question: How will the large population of aged be able to live and function independently, carrying out activities and tasks essential to an acceptable quality of life?

Aging is marked by changes in physiology and psychological functioning, accompanied by difficulties in adjusting to new social conditions and everyday technologies. It also involves lost abilities such as visual acuity or physical impairment. There is a societal obligation to understand how the needs and abilities of individuals can change with age and create programs, strategies, and sensibilities to aid this growing segment of population and society. To maintain a positive self-image, the aged person must develop new interests, roles, and relationships to replace those that have become diminished or lost. Society should not demand declining involvement of its aging members. Rather, we should take measures to avoid the injustices of aging by continuing to apply the same norms to old age as it does to other ages in the negotiation of variables such as ethnicity, gender, lifestyle, and socioeconomic status.

Theme 1: Economic and Demographic Perspectives on Aging

Changing demographic profile of populations around the world will have significant economic impacts, at the community, regional, national, or international level.

Living Tensions:

- The economic impacts of aging communities
- Working into older age; changes in productivity; attracting and managing an older workforce
- Changes in consumption, income, and assets
- Government economic policies, including taxation, welfare, social security
- Increase in the demand and cost of health care
- Economic status and the wellbeing of the elderly

Theme 2: Public Policy and Public Perspectives on Aging

The aging of populations is going to require changes in the public discourse regarding government policy and community support for the aged. Public policies may be related to legal rights, economic provision of health care, or guarantees of access to housing and social services. Community support may be related to policies and programs that enable civic engagement, provide continuing education, or support diversity.

Living Tensions:

- Public health policies related to the aged
- Defining and protecting the human rights of older people across populations and groups
- Legal issues for older people – policy and practice
- Age-friendly design for accessibility— initiatives for the public built environment, houses and retirement and care facilities
- Civic engagement and volunteerism for the aged
- Community programs for maintaining physical health, social wellbeing, and mental cognition into older age
- Epidemiology of aging

Theme 3: Medical Perspectives on Aging, Health, Wellness

The growing proportion of people living longer has significant implications for the provision of health services, and for strategies to maintain health and well-being into old age. Medical developments in a variety of areas impact the ways in which aging is viewed and managed from individual and societal perspectives.

Living Tensions:

- The biology and physiology of aging
- Food and nutrition needs for the aging population
- Brain function and cognition in the aged
- Management of chronic and/or age-related disease
- Identification and management of disease in specific populations
- Regenerative and anti-aging medical interventions
- Aging and sexual expression
- Genetics and aging
- Medications, dietary supplements and regulatory oversight

Theme 4: Social and Cultural Perspectives on Aging

An aging population will also have significant social and cultural impacts—on all age groups, as well as the aged themselves. Increased demands on family and community resources are viewed--and managed--differently across cultures, as is end-of-life care. For the aging individual, changes in social relationships, living arrangements, and levels of independence must be navigated.

Living Tensions:

- The societal impact of population aging
- Social support and networks
- Family structure, relationships, and responsibilities
- Spirituality, religious involvement, and mortality
- Cultures of end-of-life care
- Qualities of life for older people living in developing and developed countries
- Historical and anthropological perspectives on social response to aging
- Lifestyles of the aged
- Culturally specific responses to the aging
- Media representations of the aged

Andreas Motel-Klingebiel

Professor, Ageing and Later Life, Department for Social and Welfare Studies, Linköping University, Linköping, Sweden

Dr. **Andreas Motel-Klingebiel** holds a chair in Ageing and Later Life at the Division Ageing and Social Change, Department for Social and Welfare Studies, Linköping University, Sweden. He is a Sociologist and Gerontologist, as well as the current vice-president of the Swedish Gerontological Society. Before accepting the position in Sweden, he was acting as Head of Research and Deputy Institute Director of the German Centre of Gerontology in Berlin, where he served as the director of the German Ageing Survey. He received a PhD in Sociology from Free University Berlin and taught Gerontology and Sociology at the University of Vechta and at the Humboldt-Universität zu Berlin. He has extensive experience in quantitative research and his research targets the interdependencies between social change, life courses, human ageing and old age with an emphasis on quality of life, diversity, distributions, social inequality and exclusion.

The **Aging & Social Change Research Network** is grateful for the foundational contributions, ongoing support, and continued service of our Advisory Board.

When you join the **Aging & Social Change Research Network** you become part of an international network of scholars, researchers, and practitioners. We are more than a professional organization. Members present at our annual conference, publish in our journal, and write for our book imprint. Your membership makes our independent organization possible while giving you access to a large body of knowledge and professional development opportunities.

Annual Conference Access & Discounts

- Discount to the annual conference (or any other Common Ground Research Network Conference)
- Complimentary Online Only Audience Pass for Annual Conference (on request)
- Access to Digital Media for Past Conferences

Publishing Opportunities: get your research published

- Members receive 150,000 CGScholar Credits that can be applied in the Rights Agreement Phase to publish one journal article or upgrade to an Open Access Option
- Dedicated Managing Editor to review book manuscript applications
- Ability to serve as a peer reviewer and to become recognized on the Editorial Board

Access to Content

- A one-year personal electronic subscription journal and book content published by the Research Network
- \$25 annual CGScholar Credit that can be used in the bookstore

Virtual Programming: stay connected throughout the year

- Access to all of the Imagining Futures speaker series, and Meet the Author series content
- Learning Series: we offer educational, insightful, and relevant content on industry trends via online training sessions on book and journal publishing; navigating early career challenges; mentorship programs, and much more
- Partner Series: featured events by our network partners or local hosts

Building Community: all electronic books, and discounts to print copies

- Ability to grow your network via our CGScholar Community social space.
- Quarterly Research Network email newsletter containing news and information about upcoming Events, new publications, and trending topics from the Research Network.

Memberships are included in all Conference Registrations.
Make the most of your Membership!

The Journal of Aging and Social Change

The Journal of Aging and Social Change

The Journal of Aging and Social Change is an international journal for aging research. It features articles on the dynamic interplay between aging and society, exploring advances in social and behavioral science on aging, life-course and social change, involving (but not limited to) gerontology, sociology, demography, psychology, economics, communication science, education, epidemiology, public health, biology, nursing and medicine. The Journal of Aging and Social Change is devoted to multi- and interdisciplinary research that centers around social and behavioral science as well as to disciplinary approaches that are compatible and advantageous beyond merely discipline-specific discourses. Articles published in The Journal of Aging and Social Change focus on theoretical, conceptual and/or methodological advances, on the growth of empirical knowledge about age and aging in an increasingly diverse and changing global society, as well as on the impact and relevance of knowledge about aging for policies and the global society. Besides original empirical research articles, The Journal of Aging and Social Change includes brief research reports, articles that focus on theoretical and methodological advances, and review articles on cutting-edge topics. All submissions are peer-reviewed, supported by rigorous processes of criterion-referenced article ranking and qualitative commentary, to ensure the substance and significance of the published works.

Prof. Dr. İsmail Tufan

Founding Chair of Gerontology Departments, Akdeniz University & Muş Alparslan University, President of National Social and Applied Gerontology Association, Turkey

Prof. Dr. İsmail Tufan is the founding chair of the Akdeniz University Gerontology Department in Antalya, Turkey. He is also the founder of the '60+ Renewal University,' the first third-age university model supporting Gerontology Departments and lifelong education in Turkey. Prof. Dr. Tufan, who is a gerontologist, sociologist, psychologist and social pedagog educated in Germany, has designed, started and coordinated numerous Social and Applied Gerontology projects and symposiums in Turkey since 1999. All these practices are pioneering applications, services, and models for aging and the elderly. Thus, he is regarded as the father of Gerontology in Turkey. He is also the President of the National Association of Social and Applied Gerontology of Turkey. In addition to his international teaching positions in Europe, at present, he teaches at Muş Alparslan University as a visiting professor, where he works voluntarily to improve the field of gerontology and elderly education in the Eastern Anatolia Region of Turkey. His studies specifically focus on social policies that need to be improved for the disadvantaged population, especially the elderly, regarding the expected results of global demographic changes, the need and importance for care insurance in Turkey, applied gerontology in dementia and Alzheimer patients, their relatives and caretakers, and life-long learning.

Terence Seedsman

Emeritus Professor, Victoria University, Melbourne, Australia

Terence Seedsman is Emeritus Professor at Victoria University, Melbourne, Australia. His academic career has focused on ageing, gerontology, and intergenerational relationships. He has published widely on issues such as quality of life in later years, health literacy across the life course, autonomy and ethics in ageing, and the prevention of abuse among older and disabled people. Professor Seedsman has also contributed significantly to understanding how intergenerational solidarity can strengthen communities and social cohesion. Through his research, teaching, and publications, he has influenced policy and practice in the fields of ageing, health, and education.

October 15th 9:30AM (Turkey Time)

October 15th 4:00 PM (Turkey Time)

Gloria Gutman

Professor, Director Emerita Simon Fraser University Gerontology Department,
Gerontology Research Centre, Vancouver Canada

Gloria Gutman, Ph.D., developed the Gerontology Research Centre and Department of Gerontology at Simon Fraser University (SFU) and was director of both from 1982-2005. She is currently a Research Associate and Professor Emerita at SFU. Dr. Gutman is author/editor of 23 books, the most recent *Elder Abuse in the LGBTQ2SA+ Community* (Springer, 2023). During her career, Dr. Gutman has held a number of high profile roles including two terms as President of the Canadian Association on Gerontology, President of the International Association of Gerontology and Geriatrics, and President of the International Network for Prevention of Elder Abuse. Currently, she is Vice-President of the International Society for Gerontechnology and a member of the Research Management Committee of the Canadian Frailty Network (CFN-NCE). Previously she served on the World Economic Forum's Council on the Ageing Society, World Health Organization's Expert Advisory Panel on Ageing and Health, and CIHR-Institute of Aging Advisory Board. In 2007 she was awarded the Order of British Columbia and in 2010 an LLD (honoris causa) by the University of Western Ontario for her work "as an international authority in the field of gerontology" and was named one of Canada's "best 45 over 45" by *Zoomer* magazine. In 2012 she was awarded a Queen Elizabeth II Diamond Jubilee, and in 2016 the Order of Canada, the country's highest civilian honour.

October 15th 7:00 PM (Turkey Time)

Each year a small number of Emerging Scholar Awards are given to outstanding early-career scholars or graduate students. Here are our 2026 Emerging Scholar Award Winners.

Online Welcome and Training Session

Join other delegates for a pre-conference welcome reception and training session.

This special event will walk you through the CGScholar Event Microsite so you have a rich online experience by learning how to comment and participate online. It will also teach delegates how to update their profile and Presenter Pages in order to add digital media: video, sound, other files.

This will be held "live" via Zoom.

15 OCTOBER 2026 - 18:00 PM (TURKEY TIME ZONE) / 10:00 AM (CHICAGO TIME ZONE)

Online Talking Circle

Talking Circles are a distinctive feature of our in-person conference, and this year we are also taking them online. Talking Circles offer an opportunity to meet other delegates face-to-face, and engage in extended discussion about the issues and concerns they feel are of utmost importance to that segment of the Research Network. Participation is open, encouraged, and supported.

This will be held "live" via Zoom

16 OCTOBER 2026 - 18:00 PM (TURKEY TIME ZONE) / 10:00 AM (CHICAGO TIME ZONE)

Common Ground Research Networks

Founded in 1984, Common Ground is committed to building new kinds of knowledge communities, innovative in their media, and forward-thinking in their messages. Heritage knowledge systems are characterized by vertical separations--of discipline, professional association, institution, and country. Common Ground Research Networks takes some of the pivotal challenges of our time and curates research networks that cut horizontally across legacy knowledge structures. Sustainability, diversity, learning, the future of humanities, the nature of interdisciplinarity, the place of the arts in society, technology's connections with knowledge--these are deeply important questions of our time that require interdisciplinary thinking, global conversations, and cross-institutional intellectual collaborations.

Common Ground Research Networks are meeting places for people, ideas, and dialogue. However, the strength of ideas does not come from finding common denominators. Rather, the power and resilience of these ideas is that they are presented and tested in a shared space where differences can meet and safely connect--differences of perspective, experience, knowledge base, methodology, geographical or cultural origins, and institutional affiliation. These are the kinds of vigorous and sympathetic academic milieus in which the most productive deliberations about the future can be held. We strive to create places of intellectual interaction and imagination that our future deserves.

MEMBERS OF THE FOLLOWING ORGANIZATIONS

Common Ground Research Networks is not-for-profit corporation registered in the State of Illinois, USA, organized and operated pursuant to the General Not For Profit Corporation Act of 1986, 805 ILCS 105/101.01, et seq., (the "Act") or the corresponding section of any future Act.

@

The Common Ground Media Lab is the research and technology arm of Common Ground Research Networks. Common Ground Research Networks has been researching knowledge ecologies and building scholarly communication technologies since 1984.

Since 2009, we have had the fortune of being based in the University of Illinois Research Park while building our latest platform – CGScholar. This is a suite of apps based on the theoretical work of world-renowned scholars from the College of Education and Department of Computer Science at the University of Illinois Urbana-Champaign. CGScholar has been built with the support of funding from the US Department of Education, Illinois Ventures, and the Bill and Melinda Gates Foundation.

The CGScholar platform is being used today by knowledge workers as diverse as: faculty in universities to deliver e-learning experiences; innovative schools wishing to challenge the ways learning and assessment have traditionally worked; and government and non-government organizations connecting local knowledge and experience to wider policy objectives and measurable outcomes. Each of these use cases illustrates the differing of knowledge that CGScholar serves while also opening spaces for new and emerging voices in the world of scholarly communication.

We aim to synthesize these use cases to build a platform that can become a trusted marketplace for knowledge work, one that rigorously democratizes the process of knowledge-making, rewards participants, and offers a secure basis for the sustainable creation and distribution of digital knowledge artifacts.

Our premise has been that media platforms—pre-digital and now also digital—have often not been designed to structure and facilitate a rigorous, democratic, and a sustainable knowledge economy. The Common Ground Media Lab seeks to leverage our own platform – CGScholar – to explore alternatives based on extended dialogue, reflexive feedback, and formal knowledge ontologies. We are developing AI-informed measures of knowledge artifacts, knowledge actors, and digital knowledge communities. We aim to build a trusted marketplace for knowledge work, that rewards participants and sustains knowledge production.

With 27,000 published works and 200,000 users, we have come a long way since our first web app twenty years ago. But we still only see this as the beginning.

As a not-for-profit, we are fundamentally guided by mission: to support the building of better societies and informed citizenries through rigorous and inclusive social knowledge practices, offering in-person and online scholarly communication spaces

Supporters & Partners

As they say, “it takes a village.” We are thankful for the generous support of:

And to our Research Network members!

United Nations
Climate Change

**CLIMATE
NEUTRAL NOW**

Climate change is one of the most pressing problems facing our world today. It is in the interests of everyone that we engage in systemic change that averts climate catastrophe. At Common Ground Research Networks, we are committed to playing our part as an agent of transformation, promoting awareness, and making every attempt to lead by example. Our Climate Change: Impacts and Responses Research Network has been a forum for sharing critical findings and engaging scientific, theoretical, and practical issues that are raised by the realities of climate change. We've been a part of global policy debates as official observers at COP26 in Glasgow. And we are signatories of the United Nations Sustainability Publishers Compact and the United Nations Climate Neutral Now Initiative.

Measuring

In 2022 we start the process of tracking and measuring emissions for all aspects of what we do. The aim is to build a comprehensive picture of our baselines to identify areas where emissions can be reduced and construct a long-term plan of action based on the GHG Emissions Calculation Tool and standard established by the United Nations Climate Neutral Now Initiative.

Reducing

At the same time, we are not waiting to act. Here are some of the "low hanging fruit" initiatives we are moving on immediately: all conference programs from print to electronic-only; removing single-use cups and offering reusable bottles at all our conferences; working closely with all vendors, suppliers, and distributors on how we can work together to reduce waste; offering robust online options as a pathway to minimize travel. And this is only a small sample of what we'll be doing in the short term.

Contributing

As we work towards establishing and setting net-zero targets by 2050, as enshrined in the Paris Agreement and United Nations Climate Neutral Now Initiative, and to make further inroads in mitigating our impacts today, we are participating in the United Nations Carbon Offset program. As we see climate change as having broad social, economic, and political consequences, we are investing in the following projects.

- Fiji Nadarivatu Hydropower Project
- DelAgua Public Health Program in Eastern Africa
- Jangi Wind Farm in Gujarat

Long Term Goals

We're committing to long-term science-based net-zero targets for our operations – and we believe we can do this much sooner than 2050. We'll be reporting annually via The Climate Neutral Now reporting mechanism to transparently communicate how we are meeting our commitments to climate action.
